

Get absolute control of your business processes with a pre-configured ERP package that includes an ERP designed specifically for your industry segment, ensuring faster returns on deployment.

ERP Solutions for mid-market – The Challenge

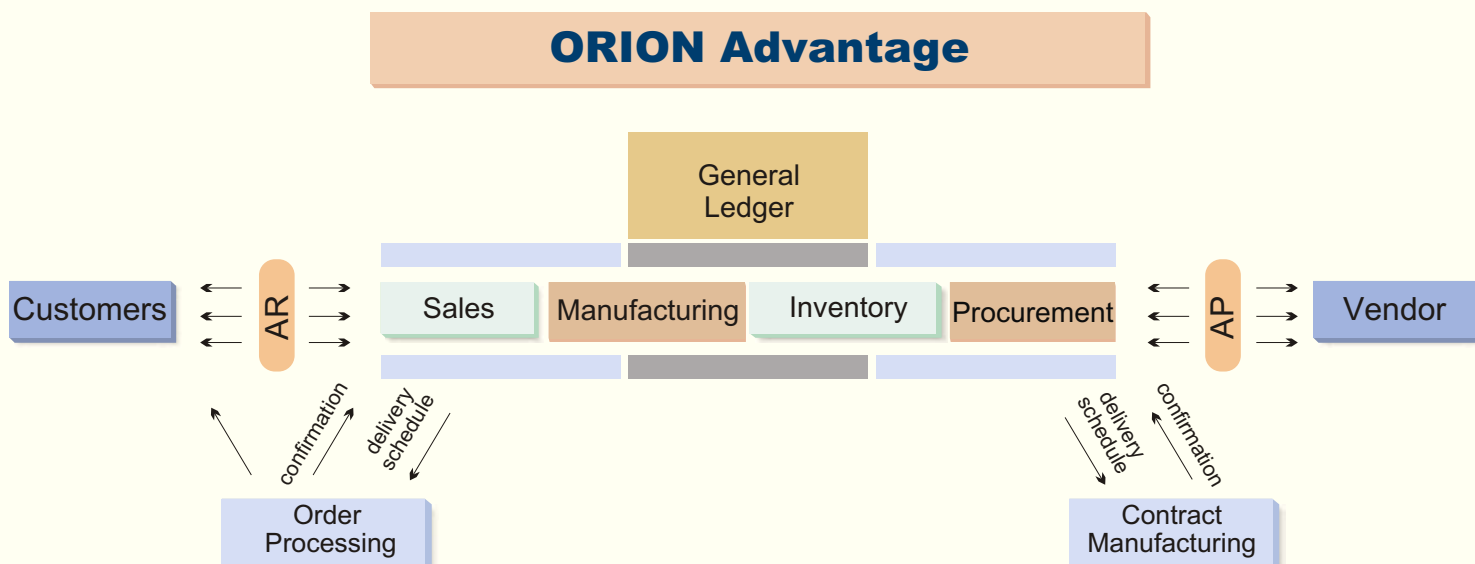

Selecting and buying an ERP application involves costly, time-consuming business process studies, evaluating multiple ERP packages, buying necessary RDBMS, OS and hardware.

An ERP application that is not suited for your vertical can take a much longer time for implementation and would require costly and painful customization. By the time you are ready to go live, the ROI equation derived at the outset would have changed considerably. This is because generic ERP applications do not address unique and core requirements of your industry segment.

ORION Advantage ERP Pack - The Solution

ORION Advantage ERP package, from our ORION suite of offerings, is a ready-to-deploy bundled solution. It comprises ORION Advantage ERP, HP Server, Windows Operating System and Oracle Database. It helps in reducing the traditional ERP evaluation-to-deploy cycle in a revolutionary manner, lowering the underlying TCO and significantly improving ROI.

- Our mid-market friendly product:**
- Offers a single window solution for your business-specific needs
 - Reduces hassles of dealing with multiple vendors
 - Ready to Deploy micro-verticalized ERP solution
 - Scalable solution that grows with you

ORION™ Advantage
